Contents Volume 34 (2002)

Snow drift losses from an Arctic catchment on Spitsbergen: an additional process in the water balance
C. Jaedicke 1
Analyses of strength and deformation of an artificially frozen soil wall in underground engineering
W. Ma and X. Chang 11
Evaluation model of permafrost thermal stability and thawing sensibility under engineering activity
W. Qingbai, Z. Yuanlin and L. Yonzhi 19
Avalanche hazard reduction for transportation corridors using real-time detection and alarms
R. Rice Jr., R. Decker, N. Jensen, R. Patterson, S. Singer, C. Sullivan and L. Wells 31
Approximate analytical solution for temperature fields in cold regions circular tunnels
L. Yuanming, L. Songyu, W. Ziwang and Y. Wenbing 43

Guide for Authors 51

Experimental studies on salt expansion for coarse grain soil under constant temperature
W. Qingbai and Z. Yuanlin 59
Interaction between a snow mantel and a flexible structure: a new method to design avalanche nets
F. Nicot, M. Gay and J.M. Tacnet 67
Observations from an aufeis windtunnel
J.T. Streitz and R. Ettema 85
A systematic method of obtaining ice concentration measurements from ship-based observations
R.J. Hall, N. Hughes and P. Wadhams 97
Amount of unfrozen water in frozen porous media saturated with solution
K. Watanabe and M. Mizoguchi 103
The effect of postdepositional process on the chemical profiles of snow pits in the percolation zone
S. Hou and D. Qin 111
A comparison of hydraulic conductivities, permeabilities and infiltration rates in frozen and unfrozen soils
C.A. McCauley, D.M. White, M.R. Lilly and D.M. Nyman 117
Determination of light carboxylic acids in snow and ice from mountain glaciers
X. Lee, D. Qin, H. Zhou and G. Jiang 127
The Sundsvall Regional Hospital snow cooling plant—results from the first year of operation
K. Skogsberg 135
Simulations of the consolidation process in first-year sea ice ridges
K.V. Høyland 143
Two-dimensional temperature and dissolved oxygen dynamics in the littoral region of an ice-covered lake
D.L. Stefanovic and H.G. Stefan 159
In situ determination of mechanical properties of frozen soils with the pressuremeter
W. Yu, Y. Lai, Y. Zhu, H. Li, J. Zhang, X. Zhang and S. Zhang 179
Collapse of floating ice covers under vertical loads: test data vs. theory
S. Beltaos 191
Pressure distribution and response of multiplate panels under ice loading
K. Riska, S. Uto and J. Tuhkuri 209
